Dear Ernest Johnson,

Thank you for taking time to speak with me Monday afternoon to discuss my thinking and offer to help the utility and the residents of the Sulfur Springs area to resolve their differences.

As I mentioned before, I have spoken with Marshall Magruder regarding the situation in Sulfur Springs. After listening to his information, which is obviously his perspective only, I offered to meet with the leadership of the communities and the leadership of the utility to help facilitate a discussion that could lead to a possible mutually satisfactory solution for all the stakeholders.

I believe I have the experience to help different stakeholder groups come together to fully discuss the issues surrounding various infrastructure problems. I have recently and successfully conducted these types of meetings in such places as Santa Fe, New Mexico; Brattleboro, Vermont; and Crystal River, Florida. My background can be found on my website www.stargroupconsulting.com.

I am offering to have a number of one on one in-person or by telephone conversations with the individual leaders of the utility and other key stakeholders. If this research indicates a meeting would be of value, I am willing to facilitate a meeting of all the stakeholders for the purpose of reaching a mutually satisfactory agreement.

I'm willing to do this at no charge with the exception that my expenses for travel, hotel and meals would be covered by those concerned.

I am available to work on this project the week of March 8. Please let me know if I can be of assistance.

Sincerely,

Bill Moyer
